

### 3. Checking Efficacy of Cartridge

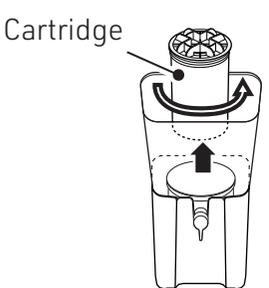

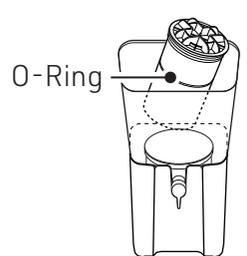

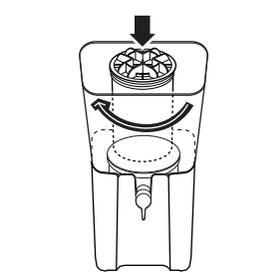

A cartridge can purify about 300 liters (79 gal) of water. To check whether the cartridge is working properly or not, use purifier checker.

- (1) Take 1 glass of purified water.
- (2) Put 1 spoonful of checker into the glass and stir it. (Use the supplied spoon.)
- (3) If water turns blue, the cartridge is still working properly.
- (4) If water turns purple, the cartridge must be replaced.

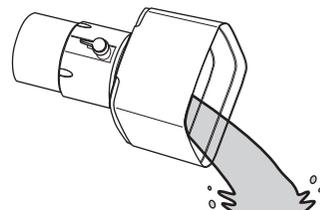

Purifier checker

### 4. Replacing Cartridge

<p>(1) Turn the knob on top of the cartridge counterclockwise until it gets loose.</p>  <p>Cartridge</p>	<p>(2) Take the cartridge out of the tank.</p>  <p>O-Ring</p>	<p>(3) Insert the new cartridge and turn the upper knob clockwise until it gets tight.</p>

## [1] MAJOR PARTS & SPECIFICATIONS

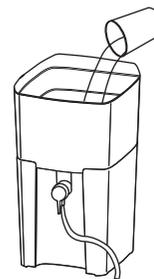

Water Tank Capacity .....	3 liters (0.79 gal)
Life of Cartridge .....	about 300 liters (79 gal)
Length of Plastic Tube .....	600 mm (23.6 Inch)
Body Dimensions.....	Height: 315 mm (12.4 Inch)
	Width: 180 mm (7.1 Inch)
	Depth: 180 mm (7.1 Inch)
Weight .....	1.6 kg (3.5 lbs)

## [2] USING THE PRODUCT

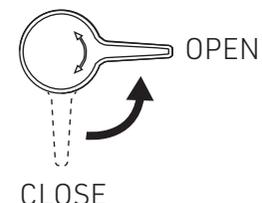

### 1. Air Removal

Air in the cartridge prevents the smooth water flow. When the TJ-6 WATER PURIFIER is used for the first time, or after cartridge is replaced, the air in cartridge must be removed.

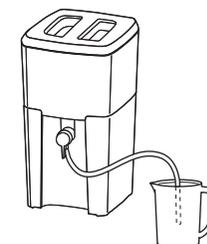

(1) Pour 5 cups (about 600 cc / 20 fl oz) of clean water into the water tank.

(2) Open the valve by turning the knob counterclockwise, water comes out through the plastic tube.

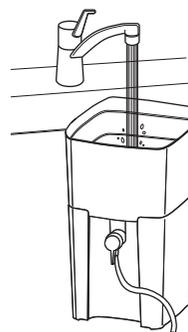

(3) After 1 minute, turn the knob clockwise to close.

### 2. Making Purified Water

(1) Pour tapped water into the water tank.

(2) Water receptacle must be placed lower than TJ-6. Open the valve, and purified water comes through plastic tube into the receptacle. Keep the water tank covered except when pouring tapped water into the tank.
